

# BridgeCom Systems iDEN Turbo

## Expand your MOTOTRBO Communications to the iDEN Network

Introducing the iDEN<sup>®</sup> Turbo by BridgeCom Systems, Inc. The iDEN Turbo is an innovative application for the MotoTRBO communication system. It provides a communication link between any iDEN network and MotoTRBO through BridgeCom's TL-NET system.

The iDEN Turbo application provides a link to BridgeCom Systems CA-1 iDEN Bridge. This allows an iDEN subscriber to communicate with and be party to a MotoTRBO talk group. The CA-1 connects your TL-NET Network to any iDEN network such as Sprint/Nextel, Harmony, or SouthernLinc. Simply add your CA-1 to an existing site where an iDEN network is available. Each CA-1 will have its own iDEN private call number. The iDEN user will call the CA-1's call number to connect to the MotoTRBO talk group. System Access is quick and the audio quality is excellent.

## BridgeCom Systems TL-NET Interoperability Link iDEN to MotoTRBO
